14 KW DOUBLE SIDED

A NEW GENERATION IN HEATING

14 KW DOUBLE SIDED INSERT

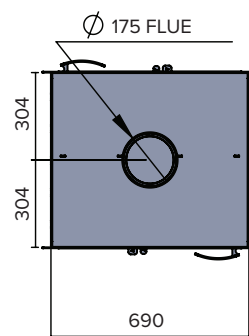

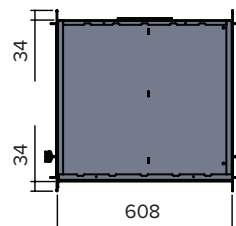

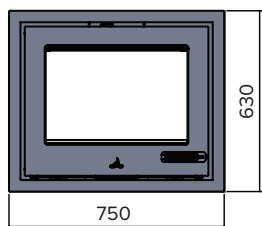

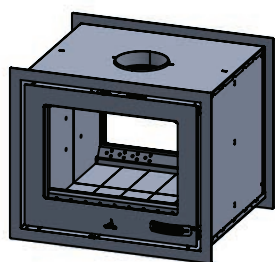

Our 14 kW Double Sided Insert is designed to be built into a brick chimney/structure between two rooms. This unit has glass on both sides of the unit to enable a marvellous view of the flames from both rooms.

This unit disperses heat equally into both rooms allowing an excellent movement of warm air around your living area.

Both doors can fully open, allowing you to decide whether to load wood into the fire from only one side or both. This also makes it very easy to clean the glass on the inside from time to time, maximising heat dispersion and viewing pleasure.

HEATING CAPACITY

14 Kw ▶ 560 m³

14 KW | INSERT | DOUBLE SIDED | DUAL AIR CONTROLS | 175 MM DIAMETER FLUE | TOP EXIT ONLY

Please refer to the **FEATURES & SAFETY REQUIREMENTS** common to all our wood stoves
