A NEW GENERATION IN HEATING

Our 18 Kw Double Sided Insert is designed to be built into a brick chimney/structure between two rooms. This unit has glass on both sides of the unit to enable a marvellous view of the flames from both rooms.

There are hot air vents into each room, which with the heat dispersed through the glass on each side will provide equal heat to both sides of this wood stove.

Both doors can fully open, allowing you to decide whether to load wood into the fire from only one side or both. This also makes it very easy to clean the glass on the inside from time to time, maximising heat dispersion and viewing pleasure.

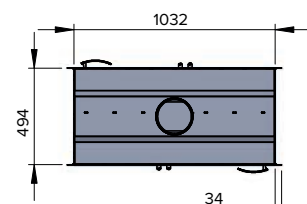

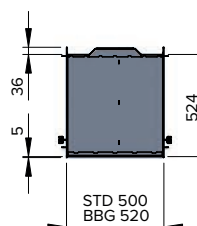

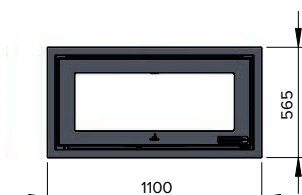

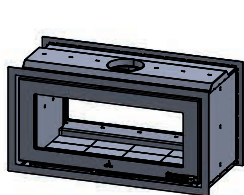

NEW FEATURE

CHOICE OF GLASS

Our 18 Kw Double Sided Insert comes in a choice of a clear glass at the rear of the door or a Black Border Glass located at the front of the door, for a more sophisticated look.

HEATING CAPACITY

18 Kw ► 720 m³

18 KW | INSERT | DOUBLE SIDED | DUAL AIR CONTROLS | 175 MM DIAMETER FLUE | TOP EXIT ONLY

Please refer to the **FEATURES & SAFETY REQUIREMENTS** common to all our wood stoves
