

BUILT IN

INSERT

8, 10, 13 KW SINGLE SIDED

A NEW GENERATION IN HEATING

Using the same tried and trusted fireboxes as the freestanding units, Infiniti's inserts are designed to be built into brickwork to give a sophisticated look.

They are manufactured with a built-in convection system. This funnels air around the outside of the hot firebox, bringing it back into the room as hot air, increasing the efficiency of the unit to just below that of the freestanding units.

They are ideal for those existing homes that have a brick chimney as well as for new homes/renovations where chimneys are to be built. With the same high temperature combustion and long burn

times of the freestanding units, these inserts are capable of heating large areas of home.

To maximise heat output from these units and to prevent damage to the brick structure, these inserts require lagging with a high temperature insulation between the steel Convection Box and the brickwork.

HEATING CAPACITY

8 Kw ▶ 320 m³ | **10 Kw** ▶ 400 m³ | **13 Kw** ▶ 520 m³

	a	b
8 Kw	667	601
10 Kw	750	683
13 Kw	870	803

8/10/13 KW | INSERT | DUAL AIR CONTROLS | 150 MM DIAMETER FLUE | TOP OR REAR EXIT
