A NEW GENERATION IN HEATING

18KW DOUBLE SIDED CONVECTION UNIT WITH BLACK BORDER GLASS & WOOD STORAGE BOX

Our double sided freestanding units are great for positioning near the middle of a large open plan area, to provide heat and the visual appeal of the flames to both sides. Both doors can easily open, enabling the fire to be fed from either side and the glass to be easily cleaned when necessary.

Our 18 Kw double sided Convection Stove can be placed on:

- Any none combustible surface
- Our Tapered Legs
- Our Wood Storage Box that matches the size of the unit and provides excellent wood storage space

18 KW DOUBLE SIDED UNIT ON TAPERED LEGS

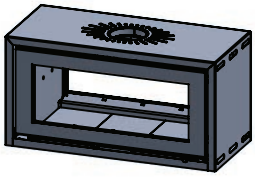

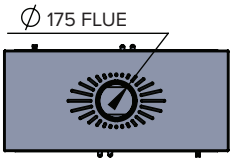

NEW FEATURE CHOICE OF GLASS

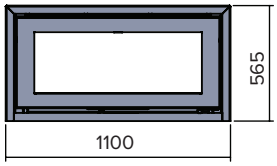

Our 18 Kw double sided stoves come in a choice of a Clear Glass at the rear of the door or a Black Border Glass located at the front of the door, for a more sophisticated look.
