CONVECTION BOX

8, 10 & 13 KW SINGLE SIDED

13 KW CONVECTION UNIT WITH WOOD STORAGE BOX

13KW CONVECTION UNIT

Our Convection Boxes are designed to be able to stand on either a non-combustible floor surface, such as concrete, tile, or granite, or they can be placed on top of one of our Wood Boxes.

The Wood Boxes are manufactured out of steel, to match the look and feel of the Convection Boxes. This will both lift the Convection Boxes and provide a large storage space capable of holding wood for several days of Stove operation.

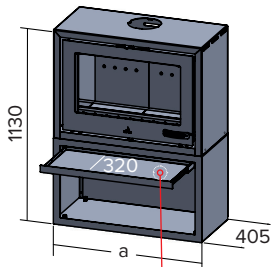

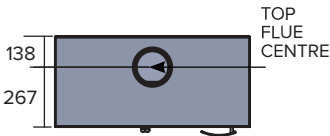

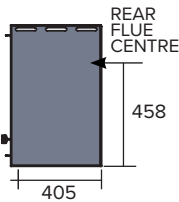

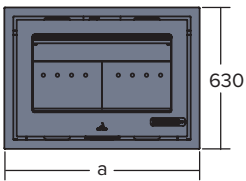

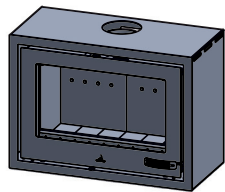

All of our Wood Boxes now come standard with a built in Pull Out table, which is ideal for holding your matches, firelighters, etc, making it easy to light the fire and catch any bits that may fall out.

The table can be closed to hide these bits and vacuumed clean once a week.
